

Child Development Centre – Pathway onto the world of Child Education

Our mission is modest – to create educators and students who are equipped to face the challenges of the 21st century. The secret is to change the way people think about learning. It is possible more than ever to create educational avenues that are self directed, social and enriched.

An Insightful Glimpse into the NatureNurture Curriculum

This requires new tools and models, but more importantly a paradigm shift in the way people think about learning. This is true for all people, not just educators, because in the 21st century, we are all educators. Consequently, we can all learn better.

Our pathway onto the world of education involves enriching the teaching learning process by delivering an interactive curriculum and empowering the educator as a facilitator rather than an instructor. It is the evolving role of the facilitator to encourage the child to be fully engaged in the two way process of learning.

SPECTRUM
COLOURS FOR ALL...

Inclusive Classrooms

if i can't learn the way
you teach, then teach me
the way i can learn.

Spectrum is a multi-disciplinary clinic that aims at inclusion of every differently able child in the main stream irrespective of his/her behavioural and learning difficulties. It operates as a team of qualified professionals who provide comprehensive services to help the child come to terms with the learning and behavioural difficulties.

It is our position that learning should lead to personal and social transformation. Our philosophy is deeply influenced by dynamic thinkers from Howard Gardner to Reggio Emilia, Vygotsky to Henry David Thoreau, Jean Paul Sartre to Jean Piaget- and countless souls in between.

We seek to present the best the world has to offer to our amazing children.
